

Company scope

BlueScope is a global leader in premium branded coated and painted steel products - the third largest manufacturer of painted and coated steel products globally. We have great strengths in engineered steel buildings in key markets, and are number one in building and construction markets.

On the 19th January 2019, BlueScope had installed ZoneSafe Proximity Warning System onto one of their 10 Ton forklift truck and provided feedback after the installation; they explained how impressed they were and how well the system had been received by the workers on site.

They expressed that ZoneSafe positively impacted on safety straight away and that the reality was that there was a real need for this system more than had first been realised.
