

Mach-SmartVision®

Checkpoint Integrated CCTV

- Improves operational efficiency
- Reduces queue waiting times and congestion
- Enhances overall public safety, security and service
- Automatic activation on hotspots
- Archive video storage and retrieval
- Single and multi screen viewing
- Incorporates the ability to introduce
 - Biometric recognition
 - PAX Tracking
 - Left Baggage alerts

Mach-SmartVision® Checkpoint Integrated CCTV Security System

Mach-SmartVision® system offers integration of all leading manufactures of CCTV equipment into MachSEMS® Security Efficiency Management System. A choice of fixed and/or 360° dome cameras provides blanket coverage of the security facility.

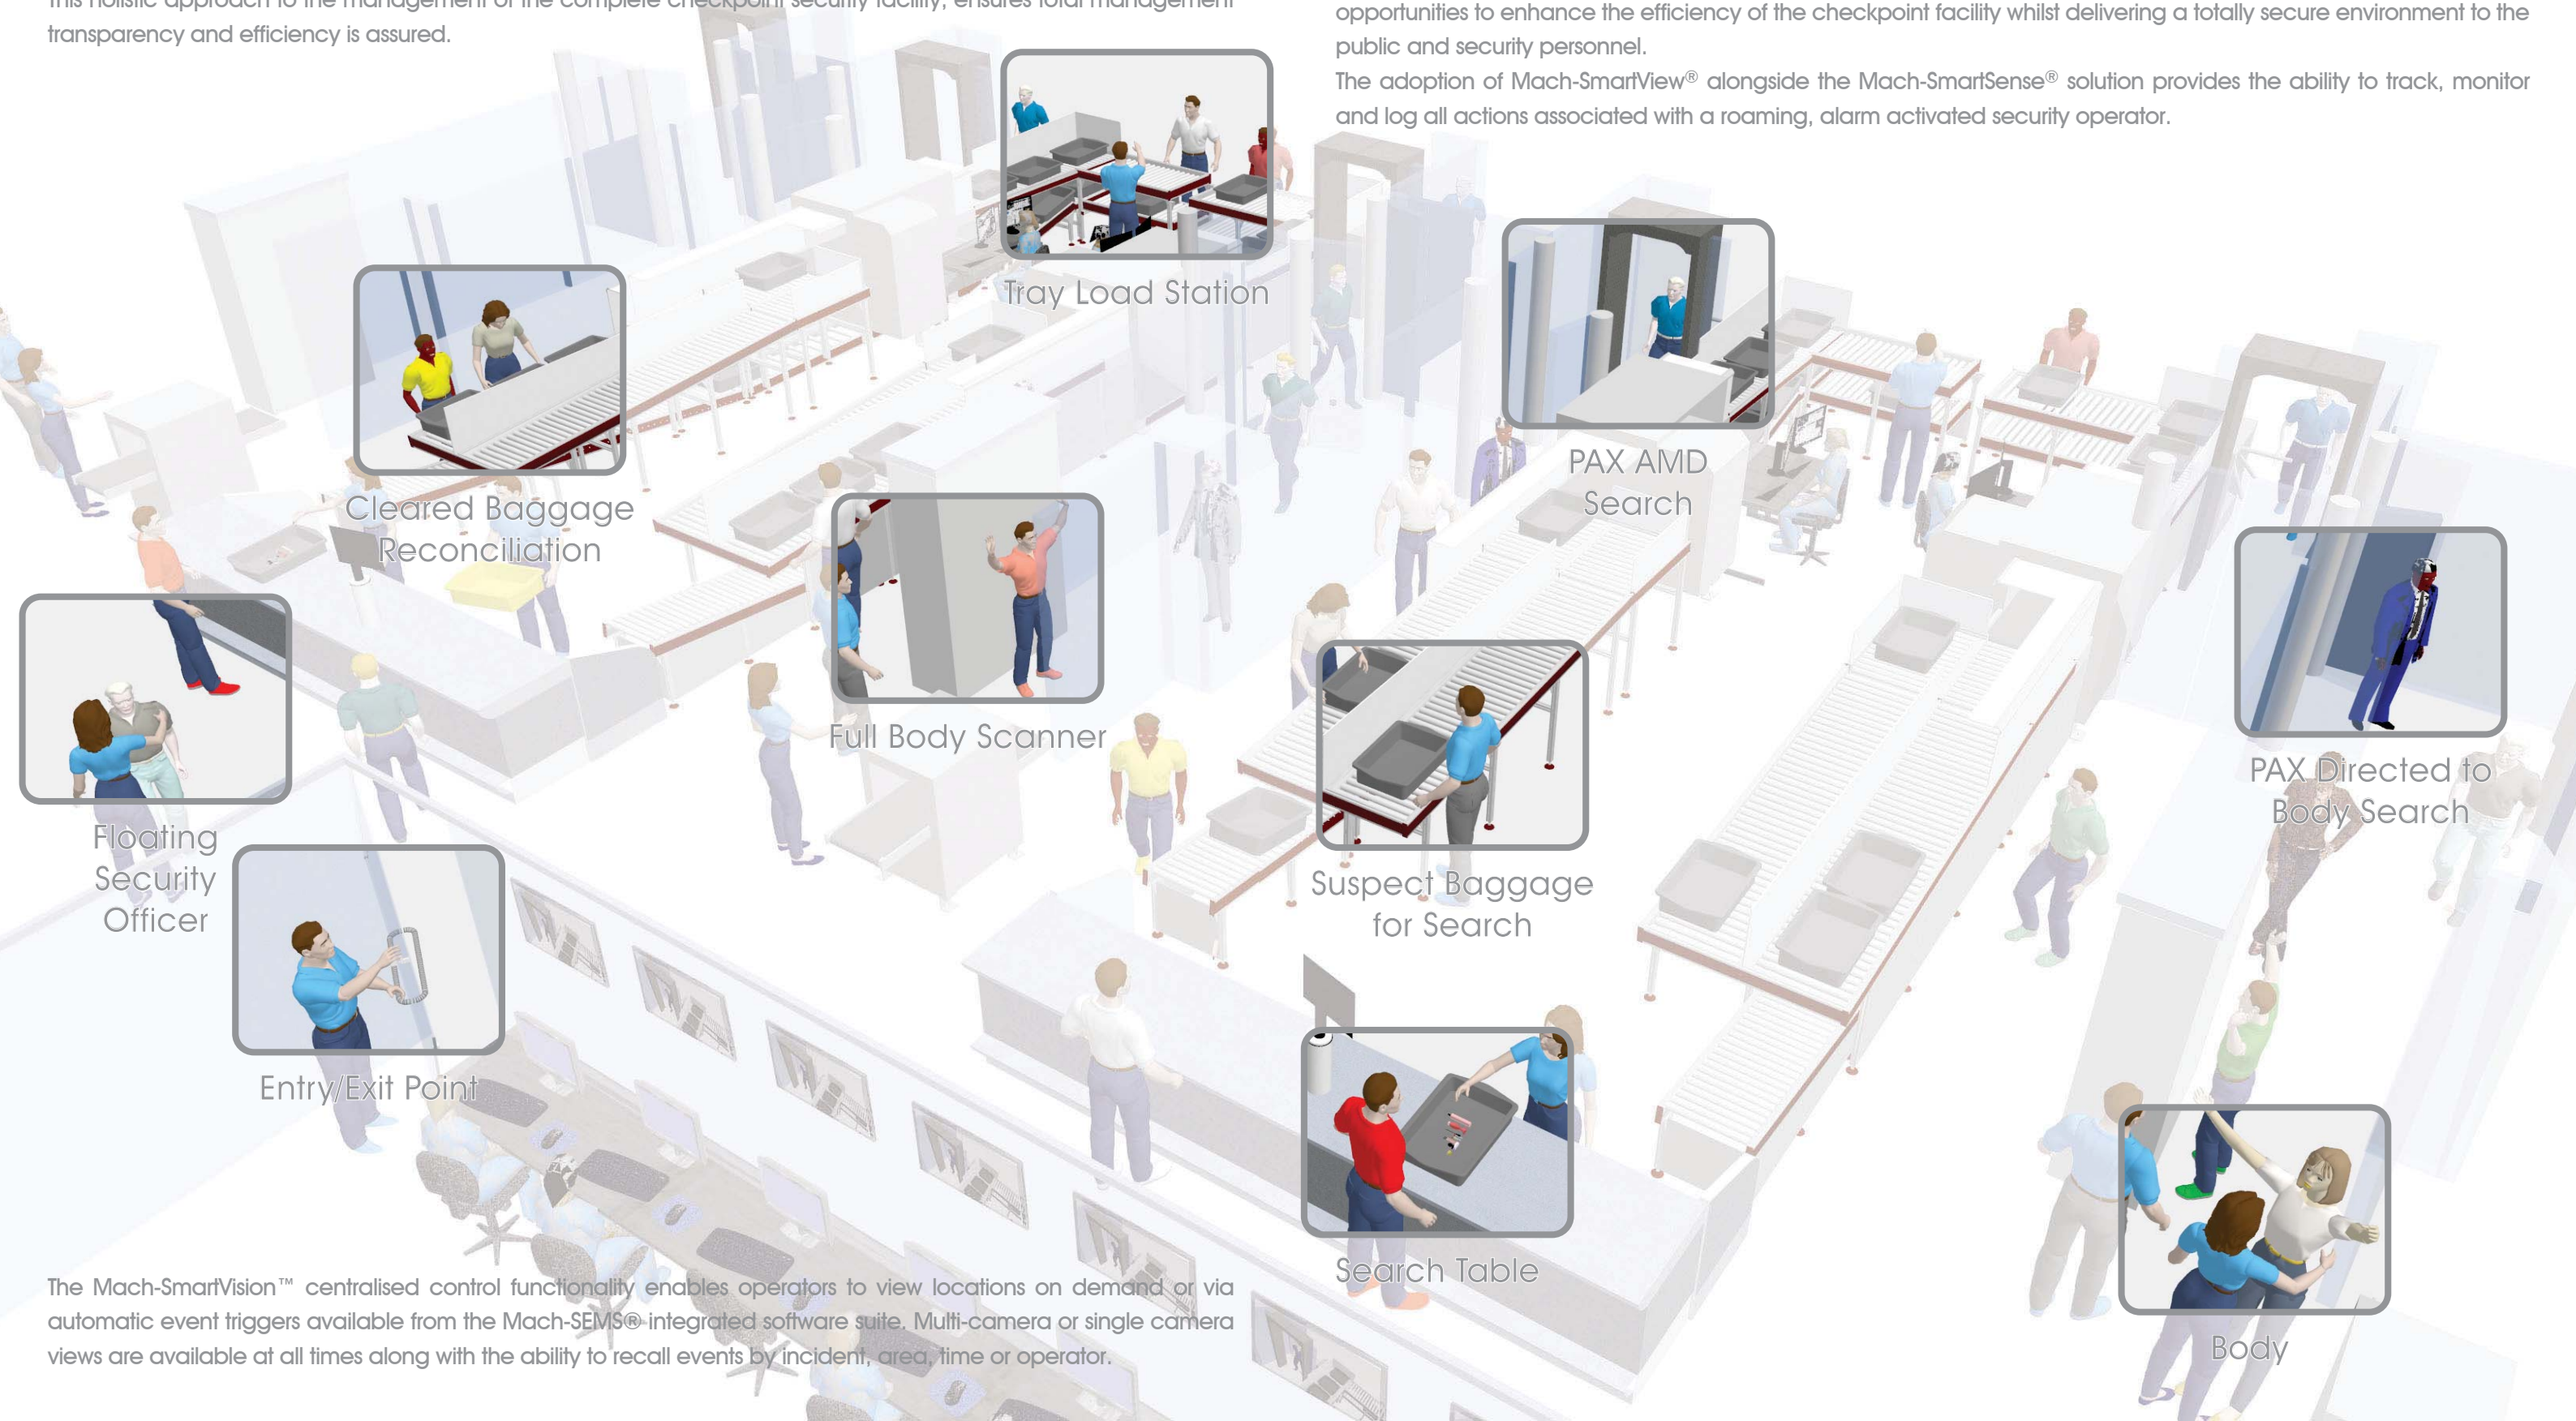

This holistic approach to the management of the complete checkpoint security facility, ensures total management transparency and efficiency is assured.

Mach-SmartVision® is an intelligent software module integrated into the Mach-SEMS® software suite. The module transforms a standard CCTV solution from a manual, reactive system into an automatic, proactive and intelligent surveillance system for the complete checkpoint security facility.

Events such as illegal passenger walk backs, discrete covert calls by security operators, congestion hot spots and faults on the system are all automatically recognised. These instant alerts are brought to the attention of the control room security officers with alarmed dynamic displays and video logging for historic analysis and protection.

Mach-SmartVision®, when adopted with other elements of the Mach-Secure® product family, offers numerous opportunities to enhance the efficiency of the checkpoint facility whilst delivering a totally secure environment to the public and security personnel.

The adoption of Mach-SmartView® alongside the Mach-SmartSense® solution provides the ability to track, monitor and log all actions associated with a roaming, alarm activated security operator.

The Mach-SmartVision™ centralised control functionality enables operators to view locations on demand or via automatic event triggers available from the Mach-SEMS® integrated software suite. Multi-camera or single camera views are available at all times along with the ability to recall events by incident, area, time or operator.

Mach- Secure[®] - Integrated Airport Security Solutions

The Mach-Secure[®] suite of innovative products and systems has been specifically designed for Airport security applications. These dedicated products and systems address the day to day operational and financial challenges faced by today's modern businesses. The Mach-Secure suite of products and systems will dramatically increase the overall efficiency of an Airport's security systems whilst enhancing the passenger experience and lowering the operational costs. For the first time Mach-Secure[®] introduces a totally integrated system solution to the Airport security environment.

Mach-Secure[®] Airport Security Products:

- Mach-SEMS[®] - Security Efficiency Management System
- Mach-SmartLane[®] - Automated Tray Handling
- Mach-SmartView[®] - Remote Search Facility
- Mach-SmartViewMatrix[®] - Centralised X-Ray Security Screening System
- Mach-SmartVision[®] - Integrated CCTV
- Mach-SmartSense[®] - Personnel Tracker
- Mach-SmartAccess[®] - Access Control
- Mach-SmartRoster[®] - Personnel Roster System
- Mach-SmartBRS[®] - Baggage Reconciliation Systems
- Mach-SmartSAC[®] - Security Audit and Sortation Systems
- Mach-SmartRegister[®] - PAX / Airline Spend Profile & PAX Locator
- Mach-SmartTutorial[®] - In Line Security Training
- Mach-SmartARCS[®] - Airport Regulatory Compliance Systems
- Mach-SmartPredict[®] - Dynamic Real Time Equipment Utilisation Planning
- Mach-SmartPupil[®] - Security Vigilance Monitoring System
- Mach-SmartDrop[®] - Automated Passenger Bag Drop
- Mach-SmartFlow[®] - Queue Analysis Management System

The Mach-Secure[®] suite of products and systems offers a coherent, structured and centrally controlled solution to provide the secure Airport of the future.
