

ZoneSafe Data Management

**Configure, Manage & Analyse.
Desktop, Web & Mobile.**

Use any Android device or laptop with Bluetooth communication to download data from the vehicle to analyse data on site and upload to our hosted online data management solution.

Manage multiple sites, systems, users and transponders with simple graphical and tabular representations of data from ZoneSafe devices.

**Easily Manage Transponder Populations,
Status Information & Analyse Data.**

- Population management via software.
- Low battery alerts via email.
- Manage when to test and replace transponders.
- Detection and near miss data accessible either at vehicle, desktop or online.
- Analyse and compare data from multiple vehicles and sites.
- Report generation.
- Assign and manage transponders assigned to staff & visitors.
