Vehicle To Vehicle Collision Warning System

Reducing the risk of industrial vehicle collisions

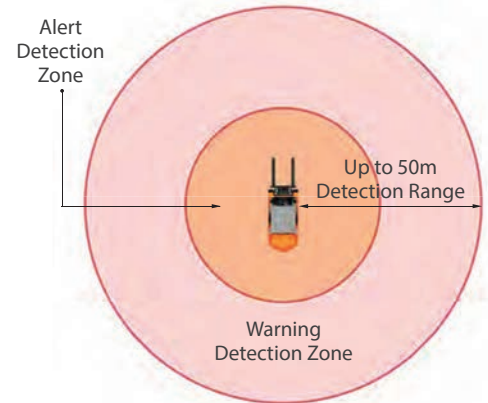

The ZoneSafe system is a long range vehicle to vehicle detection solution, designed to provide an early warning alert to both drivers when vehicles approach each other.

- The system can be fitted to any industrial vehicle
- Can be used with multiple vehicles
- Uses line of sight and enables full 360° detection
- Can detect multiple vehicles up to 50m
- Multiple warning alarms states – see below
- Alarms can be muted via button on control unit

Alarm Warning States:

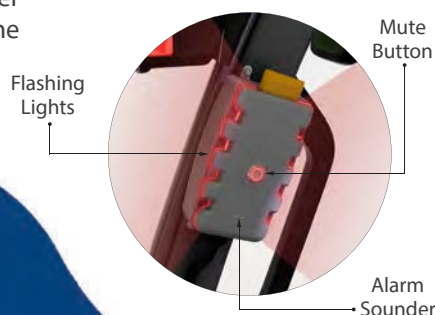

- Warning Zone Alarm - Red Circle (Vehicle Further Away)
- Alert Zone Alarm - Orange Circle (Vehicle Close By)
- Multiple Vehicles Approaching Alarm

Vehicle Detection Zones

The Control Unit. Audible visual alarm alerts the driver when detecting other Vehicle to Vehicle Unit(s) within the detection zones.

Control Unit Installed Next to Driver

Vehicle To Vehicle Alert Unit. Creates two detection zones around the vehicle - Warning Zone and Alert Zone. Automatically communicates to The Control Unit when vehicles are detected.
